Vaccon Introduces New Generation of Vacuum Switch Quick Disconnect Cordsets

New Cordsets Eliminate Labor Intensive Joining/Soldering Operations

Medway, MA—Vaccon Company Inc. announces the introduction of its new QDS Electrical Quick Disconnect Cordsets for use with Vaccon Digital Vacuum Switches and Sensors. Designed for use in robotics, automated assembly, and other industrial operations, Vaccon's 3-, 4-, and 5-pin cordsets feature threaded couplings for harsh environments, easy field conversion, and M8 or M12 threading. QDS cordsets facilitate quick, easy, and safe connection of digital vacuum switches and sensors to system controllers, PLC's, and other extension connectors. Vaccon's QDS Cordsets are a low cost solution to what had been an expensive, labor intensive assembly process. QDS Cordsets are available online at <http://www.vaccon.com>.
